4 Requirements Gathering Discussion

Key Takeaways

The link to the **ChatGPT** interview with the Lily Florist AI Agent can be found here:

https://chatgpt.com/share/68c83ff5-68c0-800b-b3be-10856c47a4b3

A copy of the interview exported has also been attached at the end of this document.

4.1 Objective

The main purpose is to make it easy for customers to order flowers online, explore my designs and schedule deliveries or pickups without hassle. For me (Lily), it helps manage orders and inventory more efficiently so I can focus on creating arrangements and serving customers better.

4.2 Products Sold

1. Fresh Flower Arrangements
    a. Bouquets
    b. Centrepieces
    c. Seasonal Designs
2. Plants
3. Gift Baskets
4. Small Add-Ons;
    a. Candles
    b. Chocolates
5. Flowers for Services such as;
    a. Weddings
    b. Parties
    c. Corporate Functions

4.3 Pain Points

Table 1: Pain Points from Client

ID	Category	Description	Theme
P1	Ordering & Confirmation Issues	Customers sometimes feel unsure if their order went through properly.	Lack of Transparency & Confirmation in Ordering Process
P2	Delivery & Time Sensitivity	Delivery timing can cause stress, especially for last-minute orders or surprise gifts.	Scheduling, Timeliness & Reliability Concerns
P3	Product Representation & Expectations	People want to see clear images of arrangements, but occasionally the flowers in stock differ from the photos.	Accuracy of Product Representation vs Real Availability
P4	Customer Convenience & Personalisation	Repeating past orders isn't always easy, so customers have to explain their preferences again.	Customer History, Personalisation &

			Ease of Repeat Ordering

4.4 Website Features

Table 2: Website Features from Client

Feature	Description	User Role
Online Ordering	Enables customers to place orders for floral arrangements with an easy checkout process.	Customer
Gallery	Showcases floral arrangement for customers to browse and choose designs.	Customer
Seasonal Updates & Blog	Provides flower tips, seasonal inspiration and stories to engage customers.	Customer
Inventory Tracking	Displays available stock so customers can only order items in stock.	Customer/Seller
Delivery Scheduling	Allows customers to select delivery date and time options for their orders.	Customer
Customer Accounts	Let's customers create accounts, view order history and easily repeat past purchases.	Customer
Social Media Links	Connects customers to social media channels to stay updated and engaged.	Customer/Seller

4.5 Target Goals

Table 3: Target Goals

Category	Target Goals
Business Growth	- Increase online orders with a smooth checkout process. - Showcase my floral designs in a beautiful and inspiring manner. - Share seasonal updates and flower care tips through a blog.
Customer Experience	- Improve customer experience with accounts for repeat purchases. - Offer flexible delivery scheduling for customers.
Operational Efficiency	- Manage inventory to avoid shortages or overstock.

5 User Stories

5.1 Draft User Stories

The following are categorised draft user stories from the interview with Lily:

1. **Ordering & Confirmation Issues**
    a. ***Pain Point:*** Customers sometimes feel unsure if their order went through properly when placed online or by phone.
    b. ***Theme:*** Lack of transparency/confirmation in the ordering process.
2. **Delivery & Time Sensitivity**

a. ***Pain Point:*** Delivery timing can cause stress, especially for last-minute orders or surprise gifts.
b. ***Theme:*** Scheduling, timeliness and reliability concerns.

3. **Product Representation & Expectations**
    a. ***Pain Point:*** People want to see clear images of arrangements, but occasionally the flowers in stock differ from the photos.
    b. ***Theme:*** Accuracy of the product representation vs. real availability.
4. **Customer Convenience & Personalisation**
    a. ***Pain Points:*** Repeating past orders isn't always easy, so customers have to explain their preferences again.
    b. ***Theme:*** Customer history, personalisation and ease of repeat ordering.

5.2 List of User Stories

5.2.1 Customer-Facing Stories

1. **US1**: As a customer, I want to browse a gallery of floral arrangements so that I can choose designs I like.
2. **US2**: As a customer, I want to read seasonal updates and flower tips so that I feel inspired and informed when making a purchase.
3. **US3**: As a customer, I want to see what arrangements are currently in stock so that I only order items available for delivery.
4. **US4**: As a customer, I want an easy checkout process so that I can complete orders quickly without confusion and with a clear pricing.
5. **US5**: As a customer, I want to pay securely using cards or digital wallets.
6. **US6**: As a customer, I want to schedule a delivery date and time so that my flowers arrive when I need them.
7. **US7**: As a customer, I want to create an account and view my order history so that I can reorder past arrangements easily.
8. **US8**: As a customer, I want to save favourite arrangements so that I can quickly find and order them later.
9. **US9**: As a customer, I want clear confirmation of my order via email or SMS so that I know my order was successful.
10. **US10**: As a customer, I want notifications when my delivery is out for delivery or completed so that I can track my gift.
11. **US11**: As a customer, I want to have the opportunity to redeem discounts on future orders from points earned.

5.2.2 Florist/Admin Stories

12. **US12**: As the florist, I want to manage inventory in real time so that customers only see available arrangements.
13. **US13**: As the florist, I want to track and manage all incoming orders so that I can efficiently prepare and schedule deliveries.
14. **US14**: As the florist, I want to update the gallery and blog content easily so that customers see fresh designs and seasonal tips.
15. **US15**: As the florist, I want to manage delivery scheduling so that I can plan routes efficiently and avoid conflicts.
16. **US16**: As the florist, I want to maintain customer accounts and preferences so that repeat customers get a personalised experience.

17. **US17**: As the florist, I want to provide links to social media so that customers can follow updates and promotions.
18. **US18**: As the florist, I want to provide points and rewards as part of a rewards program for referrals and special promotions during holidays and events.
19. **US19**: As the florist, I want to promote and refer people to some of the shop's profile pages on social media platforms Instagram and Facebook.

6 User Journey

6.1 User Goal

Selected User Story: *"As a customer, I want to order flowers online and schedule a delivery so that my gift arrives on time."*

Key Goals:

- Order Flowers Online
- Schedule a Delivery

Table 4: Objectives & Key Goals

Target Goal	Related Feature	Related User Story(s)
Increase Online Orders	Online Ordering	4, 5
Showcase Designs	Gallery	1
Flexible Delivery	Delivery Scheduling	6
Manage Inventory	Inventory Tracking	12
Improve Customer Experience	Customer Accounts	7, 8
Share Seasonal Updates	Seasonal Updates & Blogs	2

6.2 Breakdown of User Journey

Table 5: User Journey

Step	User Role	User Action	System Response
1	Customer	Visits the florist's **website**.	Homepage loads with navigation to gallery, blog and ordering options.
2	Customer	Browses the **gallery** of arrangements	System displays designs with clear images, prices and availability.
3	Customer	Selects a floral arrangement.	System shows product details, stock status and customisation options (e.g. note card).
4	Customer	Adds the arrangement to the **cart**.	System updates cart and shows subtotal.
5	Customer	Proceeds to **checkout**.	System prompts for login/guest checkout.
6	Customer	**Logs in** (or **creates** an **account**).	System retrieves stored addresses, past orders and payment details.
7	Customer	Enters **delivery address** and selects **date/time slot**.	System validates availability and confirms delivery slot.
8	Customer	Provides **payment details** and places **order**.	System securely processes payment.

9	Customer	Receives **order confirmation** on screen by **email** and/or **SMS**.	Order saved, florist notified of incoming order.
10	Florist	**Reviews** new order in **backend dashboard**.	System shows customer info, delivery time and arrangement details.
11	Florist	Prepares flowers and arranges **delivery**.	System updates status (e.g. "in preparation", "out for delivery").
12	Customer	Receives **notifications** (out for delivery, delivered).	System ensures customer is informed until delivery completion.

See Appendix for visualisation via User Journey Flow Diagram - Figure 1 and - Figure 2.

7 Requirements Specification

7.1 Introduction

The following section defines the functional and non-functional requirements for Lily's Florist Shop and the online ordering system based off the aforementioned User Journey that has been generated. The system enables customers to browse, select and order floral arrangements while providing inventory, delivery and account management features for the florist. The following requirements are derived from user stories, pain points and target goals documented above.

7.2 Functional Requirements (FR)

Table 6: Functional Requirements

Req. ID	Category	Requirement	Related User Story(s)
FR1	Ordering	A customer shall be able to browse a gallery of floral arrangements with images, prices and stock availability.	US1
FR2	Ordering	A customer shall be able to add a selected arrangement to a shopping cart.	US4
FR3	Ordering	A customer shall be able to remove or modify items in their cart before checkout.	US4
FR4	Checkout	A customer shall be able to proceed to checkout as a guest or logged-in user.	US4 & US5
FR5	Login	A user shall be allowed three login attempts before the system locks the account for 30 minutes.	US5 & US7
FR6	Payment	A customer shall be able to pay securely using credit/debit cards or digital wallets.	US5
FR7	Delivery	A customer shall be able to select a delivery date and time from available slots.	US6
FR8	Confirmation	The system shall provide a confirmation of order on-screen and via email/SMS immediately after payment.	US9
FR9	Notification	Customers shall receive notifications when the order status (e.g. in preparation, out for delivery, delivered).	US10 & US13

FR10	Account Management	Customers shall be able to create accounts, view order history and reorder past arrangements.	US7
FR11	Favourites	Customers shall be able to save favourite arrangements to quickly find and reorder them later.	US7 & US8
FR12	Inventory	The florist shall be able to update inventory in real-time to reflect available arrangements.	US12
FR13	Order Management	The florist shall be able to view all incoming orders and track status in a dashboard.	US13
FR14	Content Management	The florist shall be able to update gallery and blog content through an admin interface.	US14
FR15	Delivery Planning	The florist shall be able to manage delivery schedules and plan routes efficiently.	US15
FR16	Customer Preferences	The system shall store customer preferences to allow personalised experiences for repeat customers.	US16
FR17	Social Media Integration	The system shall provide links to social media platforms (Instagram, Facebook) for promotions.	US17 & US19
FR18	Rewards Program	The system shall allow points and rewards redemption for referrals and special promotions.	US11 & US18
FR19	Product Details	System shall display accurate product details including stock availability, price and customisation options.	US3
FR20	Blogs & Tips	Customers shall be able to view seasonal updates and flower care tips in a blog section.	US2
FR21	Search & Filtering	Customers shall be able to filter gallery items by type, occasion and availability.	US1
FR22	Multi-Device Access	Customers shall be able to access the website from desktop and mobile devices with consistent functionality.	US1 & US4

7.3 Non-Functional Requirements (NFR)

Table 7: Non-Functional Requirements

Req. ID	Category	Requirement	Related FR/User Story
NFR1	Performance	Pages shall load within 3 seconds for users on standard broadband connections.	FR1 & FR2
NFR2	Security	All payment transactions shall comply with PCI DSS standards.	FR6
NFR3	Security	Customer passwords shall be stored using salted hashing algorithms.	FR5
NFR4	Availability	System shall have 99% uptime during business hours (8AM – 8PM).	FR1 – FR22
NFR5	Data Retention	Customer data shall be stored for a minimum of 5 years if no activity occurs on the account.	FR10 & FR16
NFR6	Usability	The website shall be navigable with standard screen sizes (desktop, tablet, mobile).	FR22
NFR7	Scalability	System shall support at least 500 concurrent users without performance degradation.	F1 – F22

NFR8	Backup	Daily automated backups shall be maintained for database and media files.	F12 & F13
NFR9	Compliance	Emails/SMS notifications shall comply with privacy regulations.	FR8 & FR9
NFR10	Logging	All transactions and order status updates shall be logged with timestamps for audit purposes.	FR6 & FR13

8 Website Wireframe

8.1 Site Map

Below is the illustrated site map of the potential website that would satisfy the user journey and requirements that have been documented under headings 6 User Journey and 7 Requirements Specification.

Based off this site map the website wireframes have been created. See Appendix section 9.3 Wireframes for the individual wireframes without annotations of each of the web pages documented in the site map as well as participant or admin only viewable web pages.

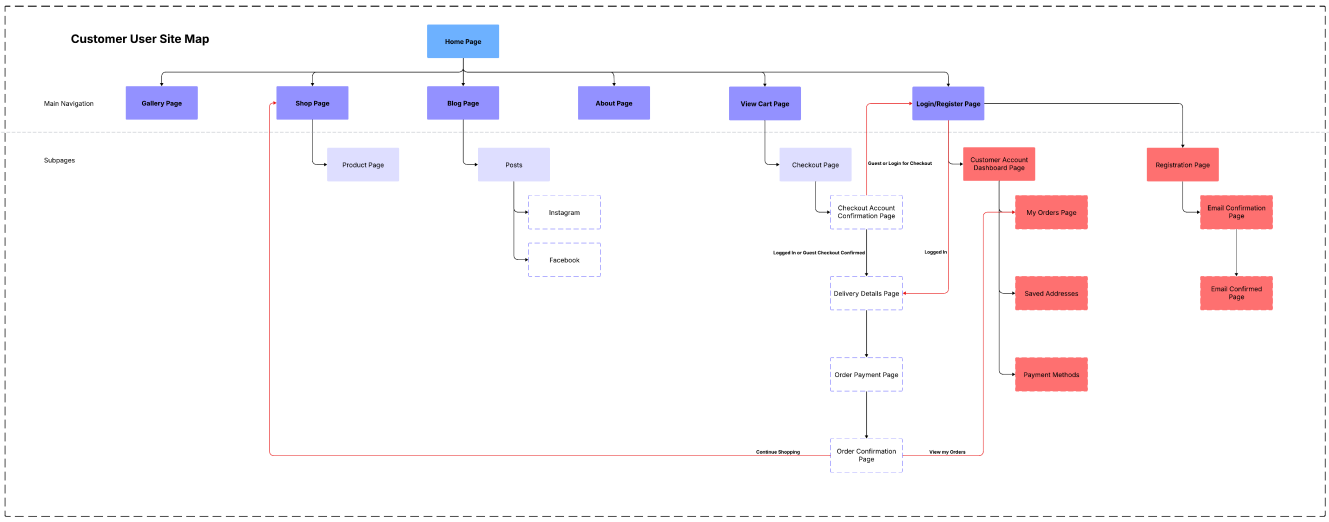

Annotated versions of the wireframes are documented under this section under the heading 8.2 Wireframes Annotated.

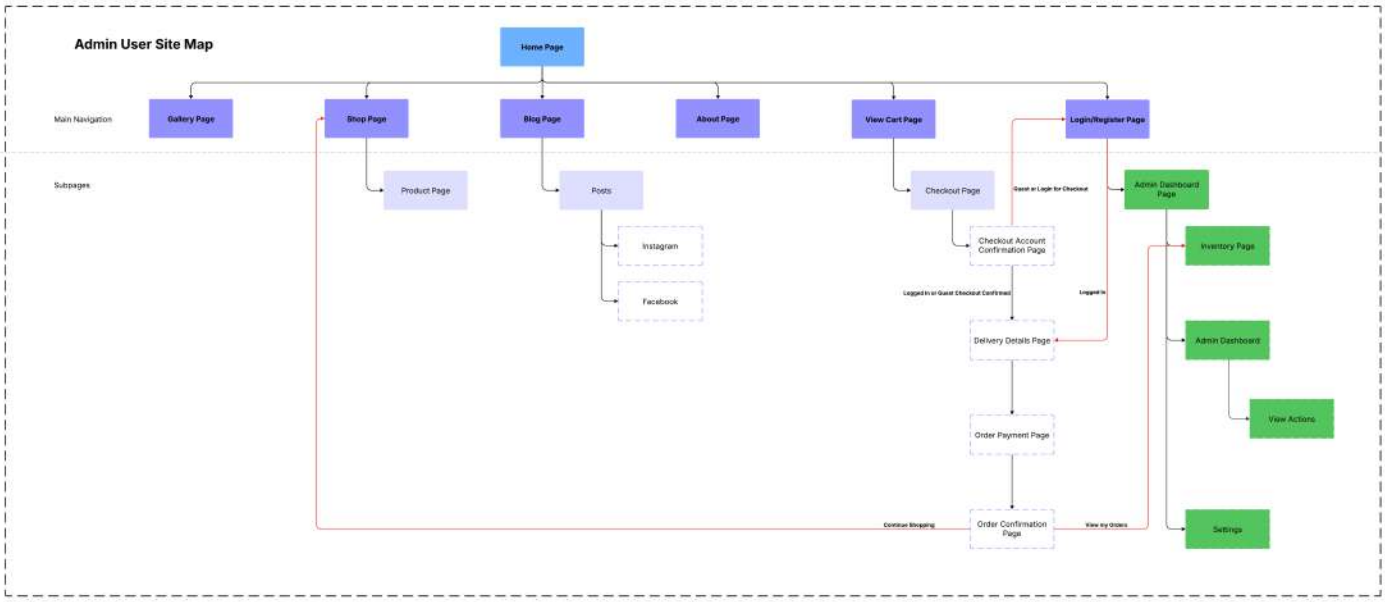

A mockup of each of the web pages developed from each of the wireframes created are also documented in the Appendix under section 9.4 Mock-ups.

Images merged on the next page for the site map diagrams.

Note: Certain pages of the website have not had wireframe or mock-ups generated as they are not a part of the selected User Journey. These include:

- About Page
- Blog Page
- FAQs Page
- Privacy Policy Page
- Reviews View
- Form Submission Animations (Contact Us)
- Administrator Dashboard Settings Tab
- Administrator Dashboard Export CSV Interface
- Administrator Refund Interface
- Forgot Password Process

8.2 WIREFRAMES ANNOTATED

Merged wireframes with handwritten annotations from the next page.

See annotations and notes also written from section 8.2.1 and onward.

- Business Growth.
- Smooth backend, simplicity → fewer errors.
- more repeat workflow for staff.

Filters Panel:
- Lily can instantly focus on what is priority.

full detail of order page.

status filter → aligns w/ operational efficiency goal: manage inventory orders without hassle.

search bar for quick retrieval → saves time when customer calls asking about an order.

- orders table
  - tabular format → clarity & efficiency.

pagination for responsive + usable w/ expansion.

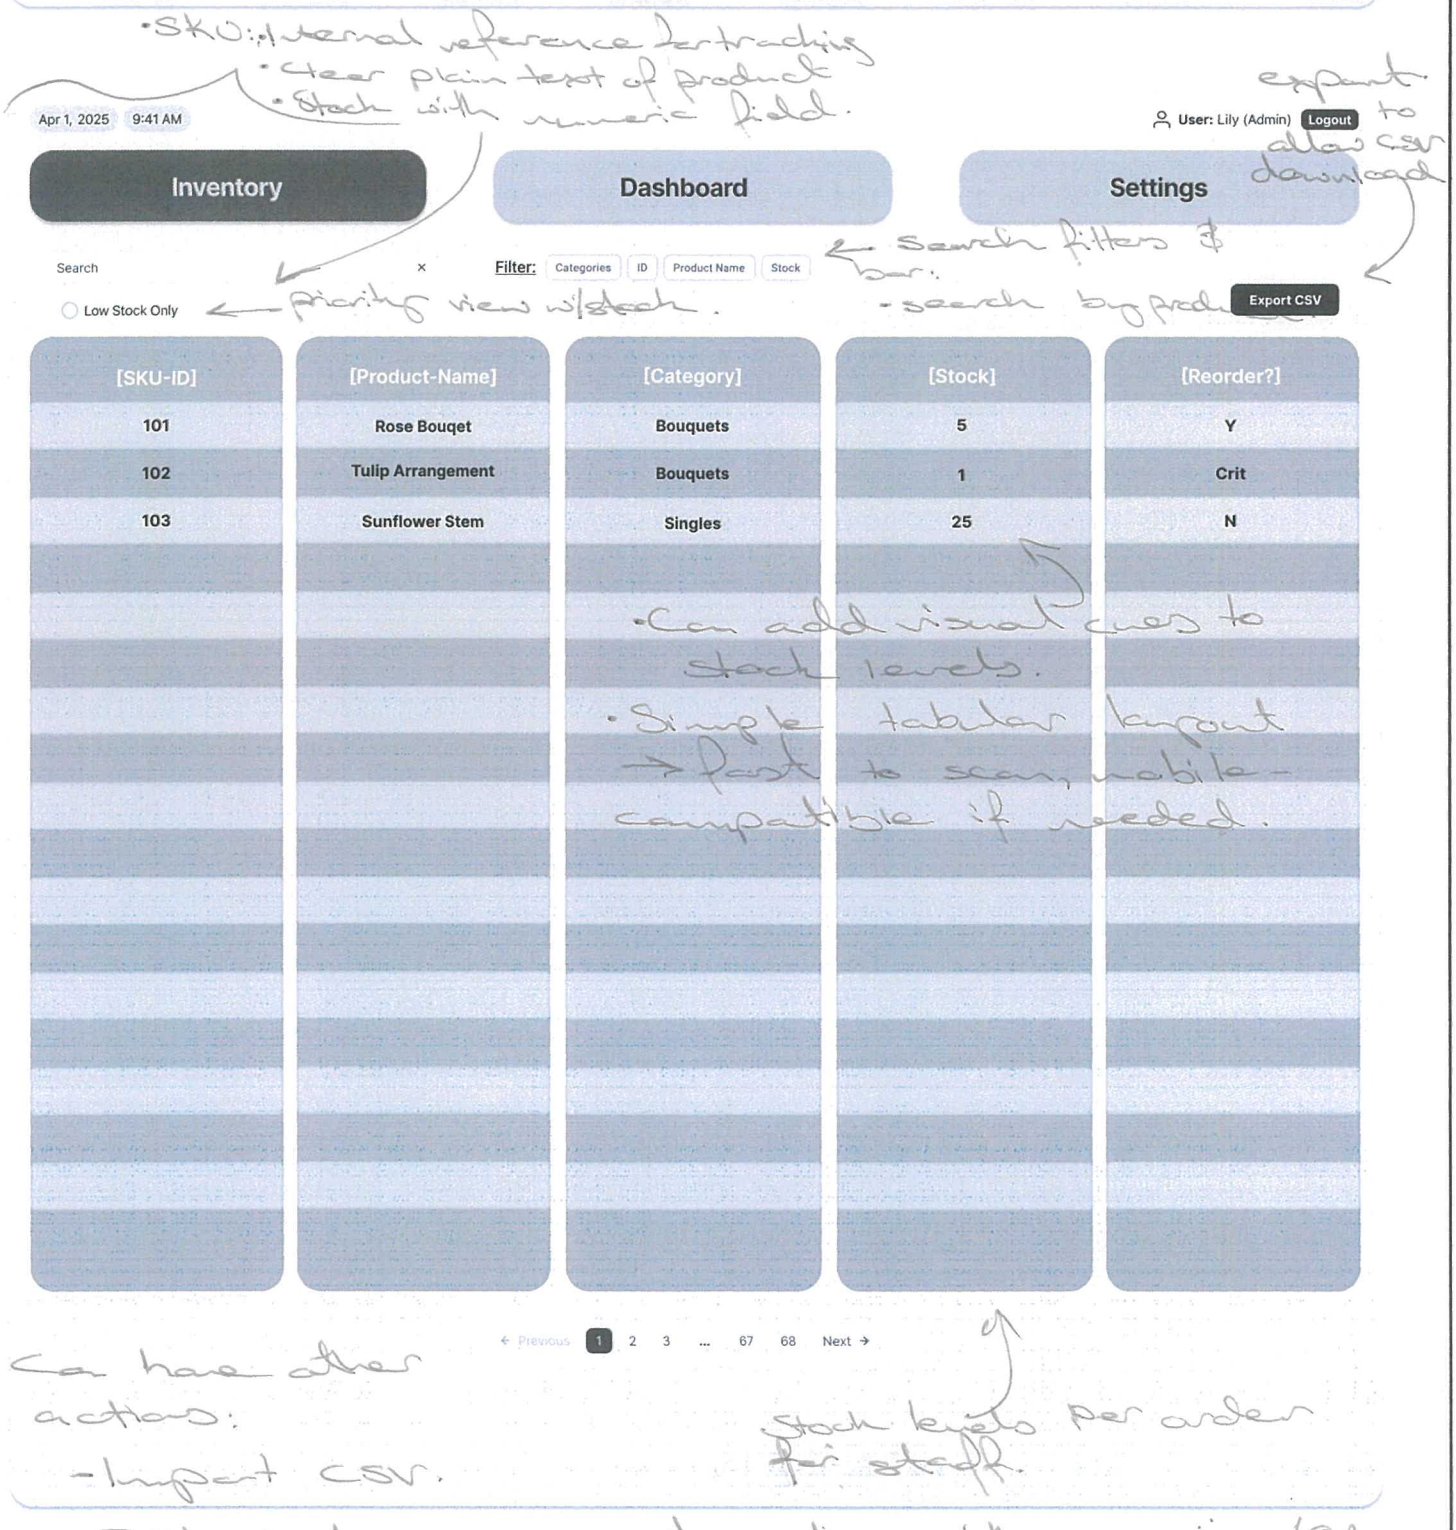

each row is single order.
- essential information.

can add on code this for further clarity on status.

- Operational Efficiency:
  - Orders grouped by status + day.
    → florist workflow optimised.
  - Prevents over-prep or missed deliveries.

- Customer Experience:
  - Accurate, timely updates (since florist can track & update status properly).
  - Reduced risk of miscommunication with customers.

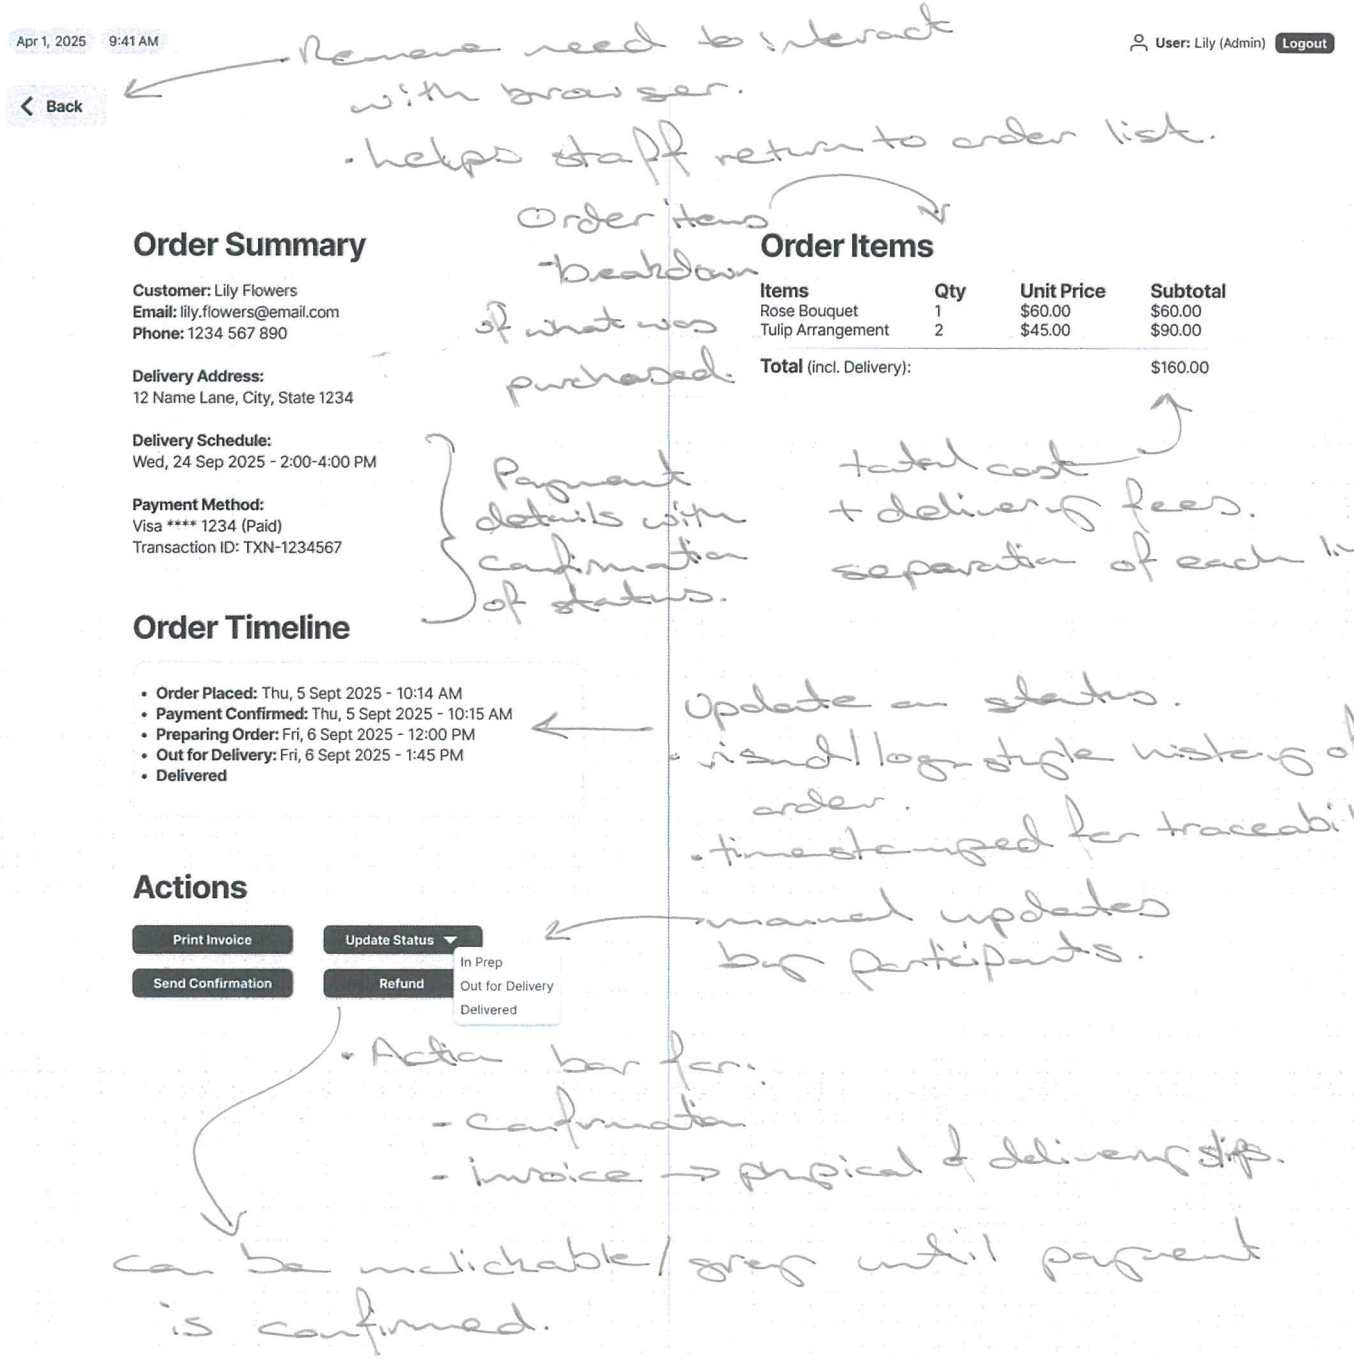

Administrator Database

Can have other actors:
- Input CSV.
- Edit stock or use attendee with scanning/QR codes.
- Bulk updating with uploading changes.

Active Order Tracking

Order #123456

- Visibility of system status.
- Real-time tracking + notifications.

Item - Qty: X
Item - Qty: X
Item - Qty: X

Delivery Date: XX MON YEAR (Time)

Status:

[In Prep] → [Out for Delivery] → [Delivered]

Active order tracking (live status bar).
- Transparent progress → reduces customer stress (pain point).

Notifications:

- 10:15 AM: Order Confirmed
- 11:30 AM: Florist Started Preparing
- 02:00 PM: Out for Delivery

- Mimics a notification timeline.
- Improves customer trust → addresses pain point.

Past Orders History

Order #122998 - Delivered - XX MON YEAR - $XX.XX Reorder
Order #122543 - Delivered - XX MON YEAR - $XX.XX Reorder

- Removes need to re-enter preferences.
- Ties directly to goal: improve repeat purchase experience.

- Flexibility & Efficiency:
- Reorder buttons reduce time for target customers.

Dynamically show delivery fees.
- Clear labels + local grouping → follows usability principle of recognition not recall.

Back to Cart | Proceed to Payment

- Keeps customer reminded
- Reduces cognitive load & prevents mistakes.

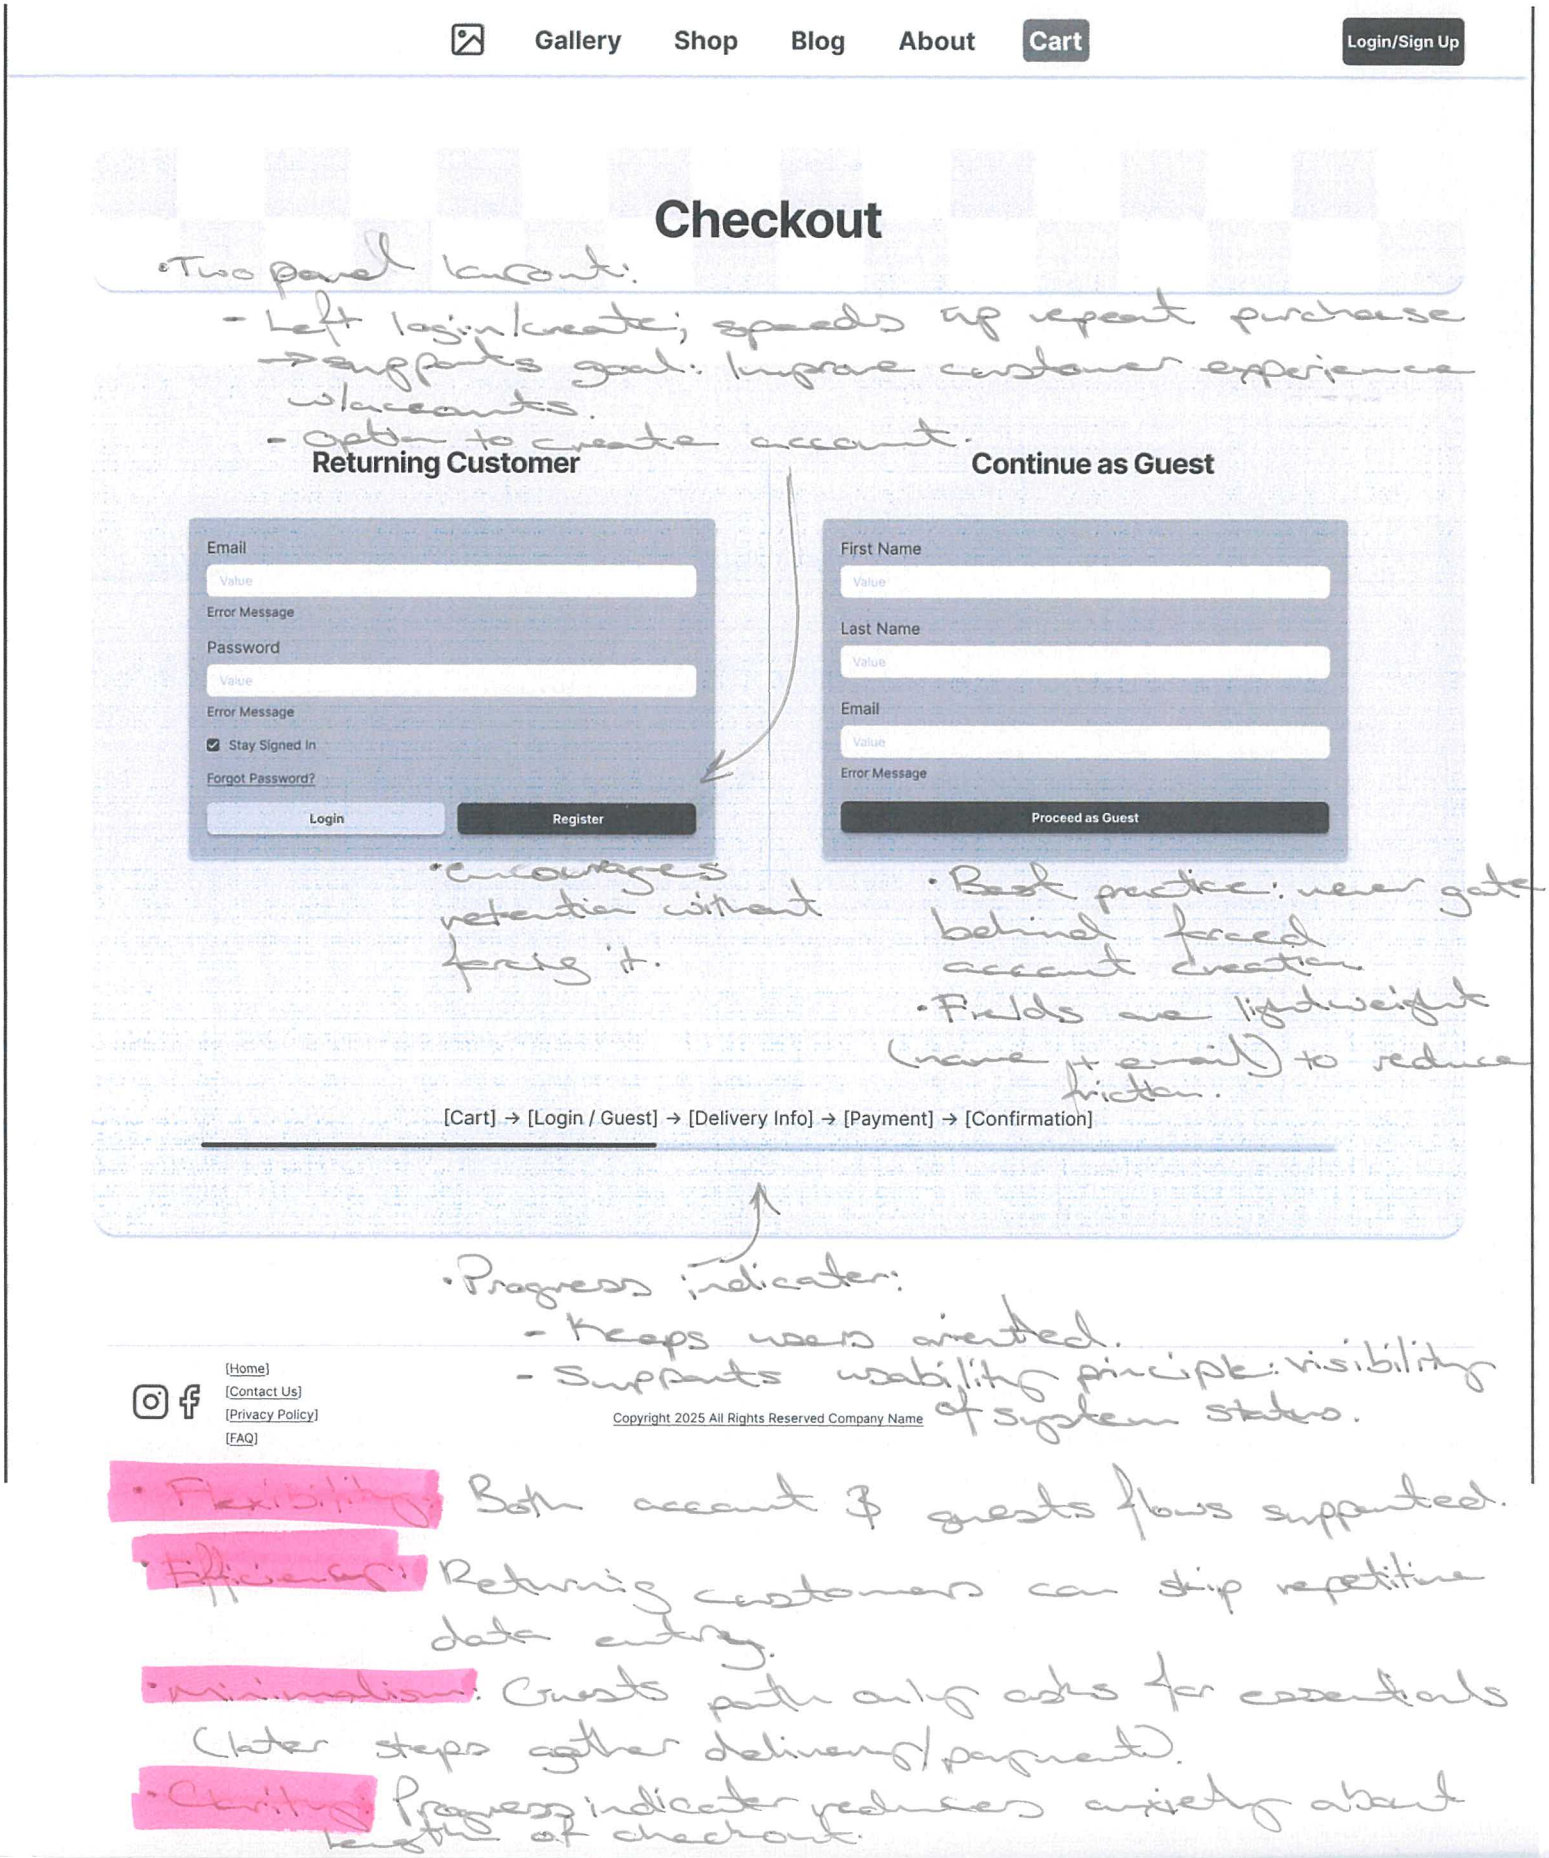

[Cart] → [Login / Guest] → [Delivery Info] → [Payment] → [Confirmation]

- Reinforces where they are in the flow.
- Reduces uncertainty.

- Consistency: Same layout + footer & navigation.
- User control: Back button to cart; editability of delivery details
- Error Prevention: Dropdowns for date/time reduce formatting errors.

Copyright 2025 All Rights Reserved Company Name

- Error prevention: Forgot password link avoids dead ends.

- Two panel layout:
  - Left login/create; speeds up repeat purchase → supports goal: improve customer experience w/accounts.
  - Option to create account.
- encourages retention without forcing it.
- Best practice: never gate behind forced account creation.
- Fields are lightweight (name + email) to reduce friction.
- Progress indicator:
  - keeps users oriented.
  - Supports usability principle: visibility of system status.

- Flexibility: Both account & guests flows supported.
- Efficiency: Returning customers can skip repetitive data entry.
- minimalism: Guests path only asks for essentials (later steps gather delivery/payment).
- Clarity: Progress indicator reduces anxiety about length of checkout.

- Consistency: Same look/feel as rest of site, reduces cognitive load.
- Accessibility: Use clear button labels, avoid hidden actions (e.g. don't bury removal).

customizable summary, receipts, rate cards, site etc. for easeware

Thumbnail & name:
- keeps visual tie to the product chosen.
- Quantity selector: users can adjust quantities without leaving the cart.

remove option always visible reduced frustration.

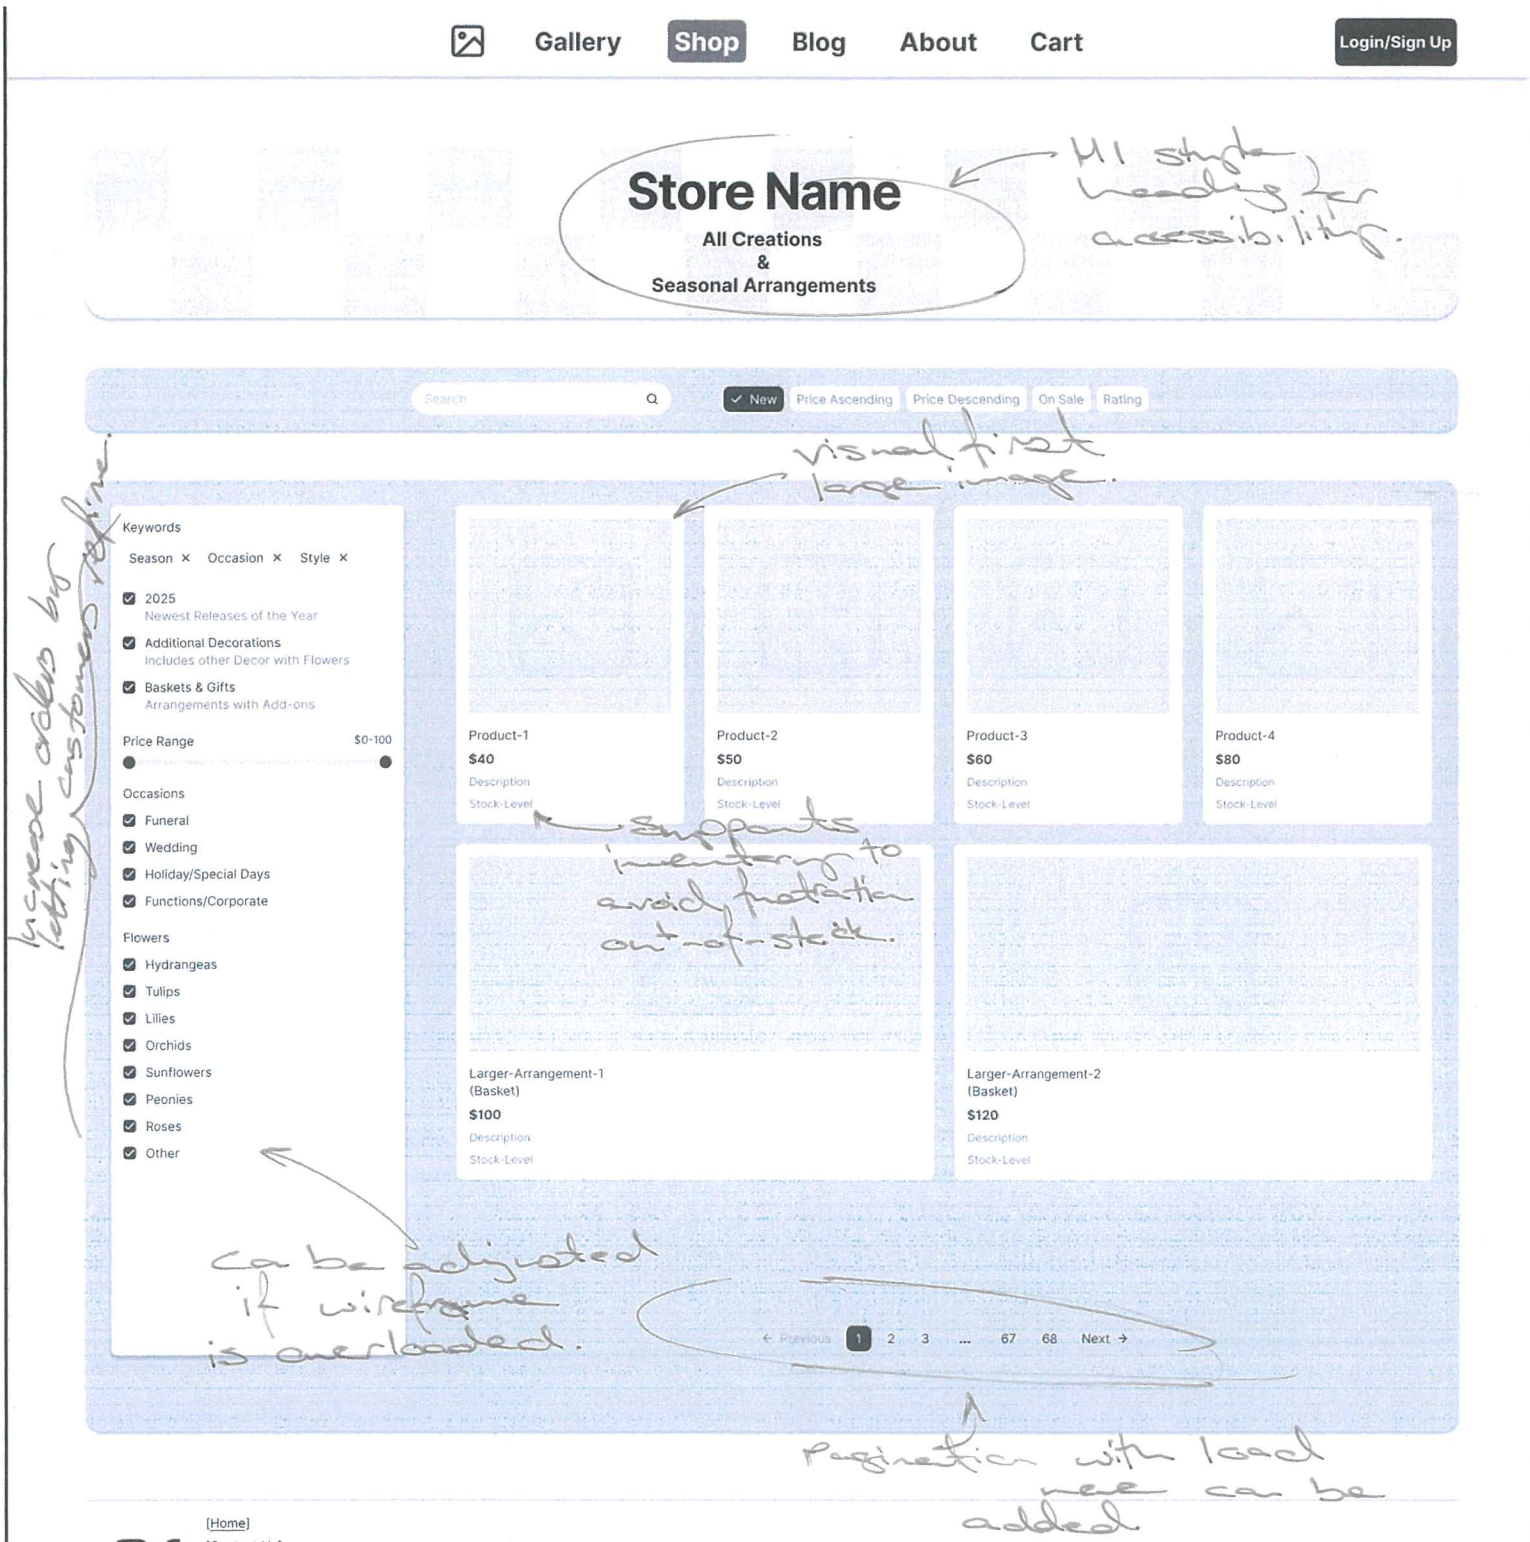

promotion & discounts are supported.

order Summary:
- subtotal, total shown.
- smooth checkout
- Proceed to checkout:

continue shopping → takes back to shop.

- Transparency: Full cost, prevents abandonment. motivation to fulfilment.
- Efficiency: Edit quantity or remove items in place, no extra steps.
- Trust: Security & returns reassurance increase conversion.

- Visual Hierarchy
- Efficiency
- Product images dominate; filters secondary but visible.
- Quick filtering to reduce checkout friction
- Can add an add-to-cart.

- Clarity: Always show price upfront. Can add stock indicator.
- Consistency: Same product card design across homepage & gallery.
- Accessibility: Text alternatives for images, keyboard friendly filters.

- Easy return to gallery/shop/blog without losing content.

- Checkout could be locked in this middle state for signed up members until email is confirmed.

8.2.1 Homepage Wireframe

Merged images at the start of this section.

8.2.1.1 Annotations/Notes

Header/Navigation Section

- **Supports:** Smoot navigation for faster access to the **Shop** (increase flow of customers for adding to cart and placing orders).
- **Best Practices:**
    - Keeping navigation items concise and not too excessive.
    - Persistent cart icon for clear checkout flow available for members and also people not signed in or want to check out as guests.
    - Logo always links to homepage.

Hero Section

- **Supports:** Showcase floral designs in an inspirational manner.
- **Best Practices:**
    - Use strong imagery (floral hero photo).
    - Clear Call-to-Action button (Shop Now) positioned centrally.
    - Accessible colour contrast for text overlay.

Featured Arrangements Section

- **Supports:** Increases orders, manage inventory (highlight the bestsellers/seasonal stock). Can be automated to query only in stock arrangements at the time as a fall-back.
- **Best Practices:**
    - Show three highlighted products with price and quick add-to-cart button.
    - Use consistent card layout for scan ability.
    - Prioritise high-res photography.

About Section

- **Supports:** Builds trust + brand personality. Helps customers see the business as a differentiation from faceless competition.
- **Best Practices:**
    - Keep copy short on homepage and link is available to view the full about page.
    - Show an authentic portrait or workspace photo on the actual about page (not included in this User Journey as focus is on order fulfilment journey).
        - Include image and Lily with physical store for brand personality on either the full about page or can be added to the homepage with rework of the about section wireframe.

Blog Preview Section

- **Supports:** Seasonal updates and flower care tips as an example.
- **Best Practices:**
    - Pull posts for latest of Lily's blog from either Facebook or Instagram.
    - Include image, title and snippet for quick skim.
    - Read More link icon/open in new browser to original post for clean homepage with minimal clutter.

Signup/Call to Action (CTA) Section

- **Supports:** Improves repeat purchases (customer accounts, email updates).
- **Best Practices:**
    - Clear value proposition.
    - Single field input reduces friction.

Footer

- **Supports:** Improves customer trust and usability (contact information, FAQs and policies).
- **Best Practices:**
    - Social media links encourage community building.
    - Keep links grouped logically (Information/Support/Connect).
    - Consistent trust and navigation as on all pages.

8.2.1.2 Principles Applied

- **Clarity and Hierarchy:** Visual weight given to hero section and featured products.
- **Consistency:** Product and blog cards uniform.
- **Efficiency:** One-click add-to-cart, minimal fields for signup.
- **Accessibility:** Contrast, alternative text and large tappable targets – efficient transition to mobile design.
- **Trust Building:** Human story, transparent policies and visible contact.

8.2.2 Gallery Page Wireframe

Merged images at the start of this section.

8.2.2.1 Annotations/Notes

Header/Navigation

- **Supports:** Access to Gallery and Shop.
- **Best Practice:** Clear distinction for customers.

Page Title and Introduction

- **Supports:** Goal to showcase the floral designs.
- **Best Practice:** Clarifies via imagery that this is inspiration-first not a catalogue.

Gallery Showcase

- **Supports:** Customer browsing inspiration without pressure to buy immediately.
- **Best Practice:**
    - Large and immersive images with minimal overlays (titles/captions only).
    - Similar grid layout that is accustomed to majority of user's expectations (similar to Instagram and Pinterest).

Call to Action

- **Supports:** Important for bridging customers to add-to-cart; encourage users who are inspired to move toward the Shop.
- **Best Practice:** CTA phrased in a friendly and natural way (not aggressive sales).

8.2.2.2 Principles Applied

- **Separation of Concerns:** Users are not distracted by checkout/cart; its inspiration only.
- **Immersive Experience:** Large visuals dominate with minimal text.
- **Navigation Flow:** Clear CTA to guide interested customers from Gallery > Shop.
- **Consistency:** Same branding, navigation and footer as Shop for familiarity.

8.2.3 Store Page Wireframe

Merged images at the start of this section.

8.2.3.1 Annotations/Notes

Filters/Categories

- **Supports:** Manage inventory by letting customers browse by availability (avoids frustration with out-of-stock). Increase orders by letting users refine quickly (price, occasion and colour).
- **Best Practice:** Use dropdowns or pill-style buttons don't overload with too many filter options.

Product Grid

- **Supports:** Showcase floral designs aesthetically and clearly. Increase online orders (clear price, stock and CTA).
- **Best Practice:**
    - Use a grid system.
    - Product card should be visual-first (large image).
    - Stock indicatory prevents disappointment at checkout.

Pagination

- **Supports:** Scalability as product range grows – can have a load more option.
- **Best Practice:**
    - Avoid infinite scroll for e-commerce (users lose context).
    - Numbered pagination gives control.

8.2.3.2 Principles Applied

- **Visual Hierarchy:** Product images dominate; filters secondary but visible.
- **Efficiency:** Quick filtering to reduce friction.
- **Clarity:** Always show stock and price upfront.
- **Consistency:** Same product card design across homepage and gallery.
- **Accessibility:** Text alternatives for images and keyboard-friendly filters.

8.2.4 Product Page Wireframe

Merged images at the start of this section.

8.2.4.1 Annotations/Notes

Product Section

- **Supports:** Product is showcased – uses large image.
- **Best Practice:**
  - Large image to showcase item/product.
  - Stock status visible.
  - Customisation options as per Lily's request – makes orders more personal.
  - Image carousel (multiple angles/close-ups).

Availability

- **Supports:** Users select items for checkout.
- **Best Practice:** System validates availability immediately (reduces last-minute stress).

Customer Reviews

- **Supports:** Builds trust and credibility.
- **Best Practice:** Show average star rating and short snippets (social proof).

8.2.4.2 Principles Applied

- **Clarity:** Price, stock, delivery and CTA are immediately visible.
- **Efficiency:** Users can customise and add to cart without extra clicks.
- **Trust:** Reviews and stock transparency reduce hesitation.
- **Consistency:** Layout matches the shop's visual hierarchy.
- **Accessibility:** Alternative text for images and configuration pickers.

8.2.5 Cart Page Wireframe

Merged images at the start of this section.

8.2.5.1 Annotations/Notes

Cart Item List

- **Supports:** Thumbnail and name keeps visual tie to the product chosen.
- **Best Practice:**
    - Quantity selector users can adjust quantities without leaving the cart.
    - Remove option always visible and reduces frustration.
    - Customisation summary with recaps note card, size and for accuracy.

Order Summary

- **Supports:** Displays a subtotal shown transparently and client goal of smooth checkout process.
- **Best Practice:**
    - Continue shopping button for flow back to shop.
    - Proceed to checkout button with CTA high visibility.

Trust/Policy Strip

- **Supports:** Improve customer experience by addressing risk upfront.
- **Best Practice:** Micro copy that reassures customers with secure checkout.

8.2.5.2 Principles Applied

- **Transparency:** Full cost breakdown prevents cart abandonment.
- **Efficiency:** Edit quantity or remove items in place.
- **Trust:** Security and returns reassurance increase conversion.
- **Consistency:** Same look/feel as rest of site – reduces cognitive load.
- **Accessibility:** User clear button labels.

8.2.6 Checkout Page (Account) Wireframe

Merged images at the start of this section.

8.2.6.1 Annotations/Notes

Two-Panel Layout

- **Supports:** Different customer types – supports goal to improve customer experience with accounts and a smooth checkout process.
- **Best Practice:**
  - Speeds up repeat purchases with login option.
  - Option to create account directly and encourages retention without forcing it.
  - No enforcement of account creation.
  - Fields are lightweight (name and email) to reduce friction.

Progress Indicator

- **Supports:** Visibility of system status.
- **Best Practice:** Keeps users oriented.

8.2.6.2 Principles Applied

- **Flexibility:** Both account and guest flows supported.
- **Efficiency:** Returning customers can skip repetitive data entry.
- **Minimalism:** Guest path only asks for essentials (later steps gather delivery and payment).
- **Clarity:** Progress indicator reduces anxiety about length of checkout.
- **Error Prevention:** Forgot password link avoids dead ends.

8.2.7 Checkout Page (Delivery Details) Wireframe

Merged images at the start of this section.

8.2.7.1 Annotations/Notes

Progress Indicator

- **Supports:** Reinforces where they are in the flow.
- **Best Practice:** Reduces uncertainty.

Main Form

- **Supports:** Essential fields for delivery, backup contact, flexible scheduling and accommodates unique customer needs.
- **Best Practice:**
    - Clear labels with logical grouping.
    - Follows usability principle of recognition, not recall.

Order Summary

- **Supports:** Keeps customers reminded what they're paying for.
- **Best Practice:**
    - Reduces cognitive load and prevents mistakes.
    - Can dynamically show delivery fees (transparency equals trust).

8.2.7.2 Principles Applied

- **Consistency:** Same layout across the checkout pages and rest of the website.
- **User Control:** Back button to cart; edit ability of delivery details.
- **Error Prevention:** Dropdowns for date/time reduce formatting errors.
- **Transparency:** Order summary and delivery costs upfront.
- **Flexibility:** Supports surprise gifts or last-minute via scheduling options.

8.2.8 Checkout Page (Payment) Wireframe

Merged images at the start of this section.

8.2.8.1 Annotations/Notes

Saved Payment Methods

- **Supports:** Repeat customer's ties to client's goal of accounts for repeat purchases.
- **Best Practice:** Reduces checkout friction dramatically.

New Card Entry

- **Supports:** Fields grouped logically (cardholder > number > expiry > CVV).
- **Best Practice:**
    - CVV field masked but still visible for confirmation.
    - Billing address option ensures compliance with fraud/security best practices.

Alternative Payment Options

- **Supports:** Improves conversion rates – not everyone wants to type card details.
- **Best Practice:** Adds flexibility (PayPal, Apply Pay and Google Pay).

Place Order Button

- **Supports:** Bold and stands out visually.
- **Best Practice:** Final confirmation step for a *smooth checkout process*.

Footer with Security Info

- **Supports:** Builds trust at payment stage.
- **Best Practice:** Including a security or "SLL Secured".

8.2.8.2 Principles Applied

- **Clarity:** Clean two-panel layout, no clutter.
- **Efficiency:** Saved cards and auto-fill reduce typing.
- **Error Prevention:** Dropdowns and validation for dates and billing address.
- **Trust and Transparency:** Order summary and secure payment cues.
- **Flexibility:** Multiple payment methods equal more user control.

8.2.9 Checkout Page (Confirmation) Wireframe

Merged images at the start of this section.

8.2.9.1 Annotations/Notes

Confirmation Message

- **Supports:** Immediate positive feedback – reduces post-purchase anxiety.
- **Best Practice:** Icon signals success and reinforcing trust.

Order Summary Box

- **Supports:** Clear overview of items, cost, delivery and payment method.
- **Best Practice:**
    - Prevents confusion or disputes later.
    - Transparency builds customer confidence – ties to *smooth checkout process*.

Notifications (Email and SMS)

- **Supports:** Ties directly to client goal of flexible communication and good customer experience.
- **Best Practice:** shows customer the system is proactive and responsive.

Confirmation Message

- **Supports:** Ties to goals of improving customer experience with accounts and supports increase online orders.
- **Best Practice: View my Orders** links to account dashboard and **Continue Shopping** encourages repeat browsing/purchasing.

8.2.9.2 Principles Applied

- **Feedback and Reassurance:** Instant confirmation message.
- **Visibility of System Status:** Explicit notification icons (email/SMS).
- **Transparency:** Clear order recap avoids surprises.
- **Encouraging Engagement:** Next-step CTAs drive retention.
- **Error Prevention:** Delivery and payment confirmation reduce uncertainty.

8.2.10 Customer Account Dashboard Wireframe

Merged images at the start of this section.

8.2.10.1 Annotations/Notes

Active Order Tracking (Live Status Bar)

- **Supports:** Flexible delivery scheduling and reliable tracking.
- **Best Practice:** Transparent progress and reduction on customer stress (pain point).

Notifications Timeline

- **Supports:** Improves customer trust and addresses pain point; *unsure if order went through properly.*
- **Best Practice:** Mimics real-world delivery tracking (like Uber Eats/Amazon).

Past Orders with Reorder Button

- **Supports:** Directly to goal to improve repeat purchase experience.
- **Best Practice:** Removes need to re-enter preferences.

Saved Addresses

- **Supports:** Ties to goal to increase online orders by reducing friction.
- **Best Practice:** Speeds up checkout and therefore, smoother user experience.

Separation by Tabs

- **Supports:** Clean AI (information architecture).
- **Best Practice:** Prevents clutter, enhances usability (principle of progressive disclosure).

Reassurance Cues

- **Supports:** Helps build confidence and loyalty.
- **Best Practice:** Each past order includes a status label and avoids ambiguity.

8.2.10.2 Principles Applied

- **Consistency and Standards:** Similar to modern dashboards (Amazon, Shopify).
- **Recognition over Recall:** Saved addresses/payments eliminate repetitive input.
- **Flexibility and Efficiency:** Reorder buttons reduce time for loyal customers.
- **Visibility of System Status:** Real-time tracking and notifications.
- **Error Prevention:** Editable/removable information (addresses, cards).

8.2.11 Backend Dashboard (Order List) Wireframe

Merged images at the start of this section.

8.2.11.1 Annotations/Notes

Filters Panel

- **Supports:** Aligns with operational efficiency goal to manage inventory and orders without hassle.
- **Best Practice:**
    - Search bar for quick retrieval.
    - Saves time when customer calls asking about an order.
    - Status filter (in prep, out for delivery, delivered).
    - Florist can instantly focus on what's urgent today.

Order Table

- **Supports:** The standard for admin dashboards (clarity and efficiency).
- **Best Practice:**
    - Tabular format with each row – single order, with essential information; order number, customer name, delivery time and current status.
    - Actions column – view to drill into full order detail page.

Status Column

- **Supports:** Enables quick visual scanning for florist to instantly know workload.
- **Best Practice:** Colour-coded best practice can be added.

Pagination

- **Supports:** Keeps interface responsive and usable.
- **Best Practice:** Prevents overwhelming the florist with hundreds of rows.

Usability Enhancements

- **Supports:** Same order numbers as in customer-facing side – easy cross-checking.
- **Best Practice:**
    - Visibility of status field always updated with real-time backend data.
    - Direct view button instead of making the participant re-search.

8.2.11.2 Principles Applied

- **Operational Efficiency:** Orders grouped by status and day – florist workflow optimised. Prevents over-prep or missed deliveries.
- **Customer Experience:** Accurate, timely updates (since participant can track and update status properly). Reduce risk of miscommunication with customers.
- **Business Growth:** Smooth backend – fewer errors and better customer satisfaction resulting in repeat orders.

8.2.12 Backend Dashboard (Inventory Tab) Wireframe

Merged images at the start of this section.

8.2.12.1 Annotations/Notes

Search and Filter Bar

- **Supports:** Consistent with other backend tabs.
- **Best Practice:** Include orders, customers and reports for familiarity.

Inventory Table

- **Supports:** Internal reference for tracking.
- **Best Practice:**
    - Clear, plain-text title of product.
    - Helps group/filter items.
    - Numeric field, updated in real time.
        - Low stock threshold configurable.
        - Out of stock meaning urgent action needed.

Action Bar

- **Supports:** Add new item to inventory.
- **Best Practice:** For uploading changes (useful after physical stock checks), allows restocking/upload for supplier reports and can implement inline quick-edit for stock counts.

Best Practice Integration

- **Supports:** Simple and tabular layout – fast to scan, mobile-compatible if needed.
- **Best Practice:**
    - Ability to act in bulk (CSV interactions and bulk update) saves staff time.
    - Visual cues for urgency to reduce scanning effort.

8.2.12.2 Principles Applied

- **Clarity and Simplicity:** Admins need fast operational decisions – clean table layout with consistent rows and columns with short descriptive entries and avoiding clutter – readable.
- **Recognition over Recall:** Removes the need for participants to memorise stock levels or items.
- **Error Prevention:** Mistakes in inventory when ordering is reduced. Stocks that hit 0 automatically disabled by system and confirmation prompt on major actions.
- **Flexibility and Efficiency of Use:** Different admins may need different workflows (quick glance vs details). Filters with search bar to narrow down items.

8.2.13 Backend Dashboard (Order Detail) Wireframe

Merged images at the start of this section.

8.2.13.1 Annotations/Notes

Order Summary

- **Supports:** Details with confirmation status.
- **Best Practice:**
    - Payment details status (paid, pending and/or failed) can be added.
    - Delivery details including scheduled window.
    - Key customer information (name, email, phone).

Order Items

- **Supports:** Breakdown of what was purchased.
- **Best Practice:**
    - Tabular breakdown.
    - Total cost including delivery fees.
    - Clear separation of each line item for scanning.

Order Timeline

- **Supports:** A visual/log-style history of the order.
- **Best Practice:**
    - Each step is timestamped for traceability.
    - Current status highlighted (out for delivery).

8.2.13.2 Principles Applied

- **Clarity and Simplicity:** The participant/florist needs to see the most critical details via methods such as order header, secondary details and actions.
- **Visibility of System Status:** The participant must always know the order's current progress with a status bar and updating status gives immediate visual confirmation.
- **Consistency and Standards:** The participant of the system should view the dashboard with predictability across tabs. This is performed via table-style layout for ordered items.
- **Progressive Disclosure:** Don't overwhelm with detail unless needed via main view with summary of items, delivery, status and payment. Allows staff to focus only on what matter for fulfilling the order.

About

Floral Blooms

Welcome to Floral Blooms

This is where every petal tells a story. As the sole owner and passionate floral designer behind this small-scale business, I pour my heart into crafting each arrangement.
My journey began with a simple love for flowers and the joy they bring to people's lives. I believe that a beautiful bouquet can brighten a room, lift a spirit and perfectly capture a special moment.
At Floral Blooms, you won't find mass-produced arrangements.

Instead, you'll find unique, handcrafted bouquets and designs created with care and attention to detail. I personally select the freshest flowers and other elements to ensure every creation is a one-of-a-kind piece of art. Whether you're celebrating a milestone, expressing sympathy or simply want to...

Cosy Comfort

The Perfect Gift for Winter Warmth

A Hug in a Bouqet: Introducing our Fireside Charm Arrangement

As the days grow shorter and a chill fills the air, there's nothing quite like the warmth of a crackling fire and the comfort of thoughtful gifts.

Our new "Fireside Charm" arrangement embodies this very feeling, designed to bring a touch of cosiness and affection to any home. This special bouquet goes beyond traditional blooms, blending the rich hues of deep red roses...

Garden Jubilee Bouquet

Featured Collection

Garden Jubilee Bouquet

Celebrate life's vibrant moments with our enchanting "Garden Jubilee" Bouquet. This lively arrangement is a joyous symphony of colour and fragrance, featuring lush pink roses, cheerful yellow ranunculus and delicate purple filler flowers, all nestled amongst fresh greenery.

Serene Harmony Vase

Elegant Arrangements

Serene Harmony Vase

Discover tranquility with our "Serene Harmony" Vase, a graceful composition designed to bring calm and sophistication to any space. This elegant arrangement features pristine white calla lilies, lush green hydrangeas and delicate purple delphiniums, beautifully contrasted with classic white roses and verdant eucalyptus.

Autumn Glow Bouquet

Seasonal Delights

Autumn Glow Bouquet

Embrace the rich warmth of the season with our "Autumn Glow" Bouquet. This stunning arrangement captures the essence of fall with its vibrant mix of fiery orange dahlias, charming peach roses and sunny yellow ranunculus, accented by delicate white snapdragons and a touch of dusty miller.

Sweet Berry Kiss Bouquet

Expressions of Affection

Sweet Berry Kiss Bouquet

Declare your affection with the delightful "Sweet Berry Kiss" Bouquet. This charming arrangement features an alluring blend of deep fuchsia roses and soft pink ranunculus, beautifully complemented by delicate lavender and white filler flowers.

Lily the Florist - Interview

Hi

Hello there! It’s so nice to hear from you today. How are you doing? 🌸

I'm good, who are you?

I’m Lily, the owner of Lily’s Florist. I’ve been running my little flower shop for over a decade, and I absolutely love creating arrangements that bring joy to people’s lives. 💐

Do you have an oppurtunity right now to assist me with conducting an interview? The purpose of the interview is to understand pain points for your customers.

Of course, I’d be happy to help with that. I know my customers well, and I can share the challenges they sometimes face when ordering flowers or interacting with my shop.

Before we continue I would like to introduce myself, I'm Vish, I am here to assist in understanding your

🚀 Powered by ChatGPT Exporter

customers pain points and help eliminate them as well as ambiguity in their context. I am also here to try to understand what would be some features I can develop for your shop such as a website.

It's lovely to meet you, Vish! Thank you for taking the time to help me with this. I'm always looking for ways to make things smoother for my customers and for myself, especially as the shop gets busier.

Okay lets begin some of the questions I have for you as part of this interview: 1. What are some common pain points you believe your customers already face?

Some of the common pain points I notice are:

- Customers sometimes feel unsure if their order went through properly when placed online or by phone.
- Delivery timing can cause stress, especially for last-minute orders or surprise gifts.
- People want to see clear images of arrangements, but occasionally the flowers in stock differ from the photos.
- Repeating past orders isn't always easy, so customers have to explain their preferences again.

2. What features should your website have?

- Online ordering with an easy checkout process.
- A gallery to showcase my floral arrangements.

- Seasonal updates and a blog with flower tips and stories.
- Inventory tracking so customers see what’s available.
- Delivery scheduling with date and time options.
- Customer accounts for order history and repeat purchases.
- Social media links to stay connected.

3. Can you describe the main purpose of this system/product in your own words?

The main purpose is to make it easy for customers to order flowers online, explore my designs, and schedule deliveries or pickups without hassle. For me, it helps manage orders and inventory more efficiently so I can focus on creating arrangements and serving customers better.

4. What are your target goals?

- Increase online orders with a smooth checkout process.
- Showcase my floral designs in a beautiful, inspiring way.
- Manage inventory to avoid shortages or overstock.
- Offer flexible delivery scheduling for customers.
- Share seasonal updates and flower care tips through a blog.
- Improve customer experience with accounts for repeat purchases.

5. How do users interact with your site?

Customers browse arrangements, add them to their cart, and place orders for delivery or pickup. Many explore the gallery for inspiration and read seasonal flower tips. Some create accounts to track past orders and reorder easily. Others use the contact form for custom requests, event inquiries, or special occasions. Social media links also bring them to the site to see new designs and promotions.

6. How should users checkout?

Checkout should feel simple and seamless. Customers can:

- Add arrangements to their cart with clear pricing.
- Choose delivery or in-store pickup with a preferred date and time.
- Enter recipient details and include a personal message.
- Pay securely using cards or digital wallets.
- Receive an email confirmation with order details and updates.

7. Do you have a rewards program?

Yes, I do. Customers earn points with every purchase, which they can redeem for discounts on future orders. I also give bonus points for referrals and run special promotions with extra rewards during holidays like Valentine’s Day and Mother’s Day.

8. What systems do you currently use?

Right now, I handle orders mostly through phone calls, in-person visits, and a basic online form. Payments go through an in-store point-of-sale system, while custom event invoices are managed separately. Inventory is tracked by hand, with occasional spreadsheet updates. Social media helps bring in customers, but it isn’t tied directly to sales or orders.

9. Do you use social media?

Yes, I use social media quite a bit. I post arrangements, seasonal specials, and behind-the-scenes photos on Instagram and Facebook. It’s a great way to connect with customers, share promotions, and inspire them with new floral ideas.

10. What is your competition?

My main competition comes from larger online flower delivery services and a few local florists nearby. The big online companies attract customers with convenience, while local shops compete with personalized service. I try to stand out by offering unique, custom designs and a warm, personal touch that bigger companies can’t match.

11. What products do you sell?

I sell fresh flower arrangements like bouquets, centerpieces, and seasonal designs. I also offer plants, gift baskets, and small add-ons like candles or chocolates to go with

the flowers. For events, I create custom floral designs for weddings, parties, and corporate functions.

12. Can you provide more details of the unique, custom designs and warm, personal touches that you add to your products and/or services?

For custom designs, I take time to learn about the occasion and the recipient's personality or favorite flowers, then build an arrangement that feels truly personal. I often handwrite notes for gift orders, include little seasonal accents like pinecones in winter or seashells in summer, and adjust colors to match themes. Regular customers sometimes get a surprise extra bloom or a small upgrade as a thank-you for their loyalty.

13. What is causing you the most frustration?

The biggest frustrations are juggling orders during busy seasons, keeping inventory accurate, and managing last-minute delivery requests. Without a smooth online system, I spend extra time confirming details with customers and updating stock by hand, which can slow everything down.

14. On your website would you like to have a gallery web page seperated from a shop web page?

Yes, I'd like them separate. The gallery should inspire customers by showing past designs and event work, while the shop should focus on items available for immediate purchase with clear pricing and ordering options.

15. What are the main types of flowers that you use in your creations/arrangements?

I work a lot with roses, lilies, tulips, hydrangeas, orchids, and sunflowers. Seasonal favorites like peonies in spring or poinsettias in winter are also popular. I like mixing classic blooms with greenery and textured accents to make each arrangement feel fresh and unique.

16. Do you find your customers usually filter their selection of flowers and products by the type of flower, colours of the arrangements, occasions or season of the arrangement or a combination of these?

It's usually a combination. Some customers shop by flower type, especially if they know a favorite bloom. Others focus on color themes to match an event or sentiment. Many browse by occasion—birthdays, anniversaries, sympathy, or holidays—while seasonal collections also guide their choices around Valentine's Day, Mother's Day, and Christmas.

17. What are the common price points of your arrangements and how are the prices determined, i.e. size, complexity and/or add-ons?

Most arrangements range from about $40 to $120. Smaller, simpler bouquets are on the lower end, while larger or more intricate designs cost more. Prices also vary by flower type—premium blooms like orchids are higher. Add-ons like vases, chocolates, or candles can increase the total as well.

18. Would you want your website to allow customers to order products and these are delivered on specific dates? And would you want specificity/choice of customers to round down to time as well or would you be interested in courier services where that decision is limited therefore, we should limit customer decisions on orders to just specificly dates of delivery?

I'd definitely like customers to be able to choose specific delivery dates, since flowers are often tied to special occasions. For timing, I think offering delivery windows or time slots (like morning or afternoon) would be very helpful. Relying only on couriers with no time choice can cause stress, especially for surprises or events.

19. Okay so your store you would want to offer delivery and would you also want to offer a pickup service from your primary store location?

Yes, I'd like to offer both. Many customers enjoy the convenience of delivery, but others prefer picking up from the shop, especially if they want to see additional options or add something last-minute.

20. What is your policy on returns of items from customers?

Since flowers are perishable, I don’t accept traditional returns. However, if there’s ever an issue—like damaged flowers or a delivery mistake—I offer a replacement arrangement or a store credit to make it right for the customer.

21. What are the types of payment methods you would like to accept from your customer?

I’d like to accept credit and debit cards, digital wallets like Apple Pay and Google Pay, and gift cards. For larger events, I also handle payments through invoices, so having that option online would be useful too.
